April 2025

From the Desk of the Secretary-Treasurer

David S. Haynes, MD, MMHC

A MESSAGE FROM THE PRESIDENT

J. Thomas Roland Jr., MD

I am very much looking forward to the 60th Annual ANS Spring meeting in New Orleans on May 16-17. Our educational teams have responded to the post meeting evaluation comments from ANS members and attendees about the fall meeting in Miami and have put together a very clinically oriented program with three excellent panels related to issues we often face as neurologists. These include *Management Of Facial Paralysis following Temporal Bone Trauma*, moderated by Dr. Oliver Adunka; *Complications in Neurologic Surgery*, led by Dr. Jacques Herzog and *Management of Complex Vertigo*, moderated by Dr. Meredith Adams. See more program highlights on page 3.

I am very thankful for being able to have worked with such a talented and productive team of individuals including the committees and committee heads. Dr. David Haynes, the outgoing Secretary/Treasurer and President-Elect, and Dr. Yuri Agrawal the outgoing Education Director deserve a special thanks from me and the Society for keeping us on target educationally and financially. Kristen Bordignon and her administrative team continue to work tirelessly to keep the Society on track with all of the functions that are important to the members.

On another concerning note, we as caregivers, clinicians, researchers and trainees are faced with serious issues that did not really exist at our last fall meeting. With lightning speed, all that we hold to be true and important is being threatened. Our educational institutions, our research institutions and our funding agencies might see radical changes that will affect the way we train our students, residents and fellows and how we conduct meaningful research that translates to improved health of our population.

I felt that, as a whole Society, we were making great progress toward embracing the differences between people of all communities and valuing the many contributions of all of us working together toward common goals. Our country's attention to international health care is/was extraordinary and the spirit of giving inspiring. Our regulatory agencies that protect the health of our populations are now seemingly compromised. Exchange of students from other countries, students that become faculty and train others, might not be possible soon. We may not be able to voice opinions and concerns without fear of significant retribution. Our country and relationships to others has changed dramatically. I do, however, feel that this society will continue its' mission with enthusiasm. Our new group of council and committee members and our new Society leadership might face some barriers, but I am confident in their abilities to move this Society in the right directions and provide a forum for all of us to thrive and communicate.

We will continue to deliver excellence with up-to-date educational content to our members and attendees and develop future leaders and contributors to our field. I look forward to seeing many of you at the Spring meetings and sharing thoughts and ideas.

Thank you to all the members of our Society and I hope you enjoy New Orleans and this year's American Neurology Society Spring program.

Warm regards,
Tom

**ANS & AOS COSM SCHEDULE
AT-A-GLANCE**
ALL EVENTS AT THE HYATT REGENCY NEW ORLEANS
FRIDAY, MAY 16

ANS Business meeting - 1:00 PM (*open to all registered attendees*)
New member introduction

ANS Scientific Session - 1:30- 5:05 PM
Celestin Ballroom E - Level three
(*AOS & ANS Poster award winners announced at 3:30 PM*)

2nd Combined COSM Poster Group (Friday and Saturday)

ABEA, ALA, ANS, AOS, ARS, TRIO
(*Elite Exhibit Hall-Level one*)
Poster Viewing: 9:00 AM 7:00 PM
Meet the Authors Reception: 5:30 PM - 7:00 PM

WIN RECEPTION (Women in Neurotology)

6:00-7:00 PM
Location: Bolden 6- Level two

ANS PRESIDENT'S RECEPTION - 7:00-8:30 PM

Location: Empire Ballroom A
(*Members/invited guests only-complimentary with paid registration-business casual*)

SATURDAY, MAY 17

ANS Business meeting - 7:00 AM (*open to all registered attendees*)
(*Journal and other Committee Reports*)

ANS Scientific Session - 7:30 AM - Noon
Celestin Ballroom E - Level three

AOS Business meeting - 1:00 PM (*open to all registered attendees*)
New member introduction

AOS Scientific Session - 1:30 - 5:10 PM
Celestin Ballroom E - Level three

2nd Combined COSM Poster Group

Poster Viewing: 9:00 AM - 4:00 PM (poster removal 4-6 PM)

AOS PRESIDENT'S RECEPTION/BANQUET

6:30 PM - 11:00 PM
(*Members/invited guests only-Advanced ticket purchase required*)

SUNDAY, MAY 18

AOS Business meeting - 7:00 AM (*open to all registered attendees*)
(*Journal and other Business Reports*)

AOS Scientific Session - 7:30 AM - Noon
Celestin Ballroom E - Level three

ANS SOCIAL MEDIA

The ANS Social Media Committee continues to gain more “followers” under the leadership of Dr. Robert Hong and team. We are pleased to announce that Dr. Dennis Bojrab II, current member of the SM committee, will step in as Chair in June and also serve alongside Dr. Peter Volsky as the Social Media Program Chairs for the ANS Spring Meeting at COSM .

We greatly appreciate your continued support and engagement. If you are active on Social media, won't you follow ANS today!?

HOT TOPIC!

NIM VITAL Facial Nerve Monitor Suggestions to Improve Sensitivity to Mechanical Stimulation

Concerns remain about less sensitivity of the NIM Vital to mechanical stimulation during mastoidectomy in comparison to the prior model (NIM 3.0) even after several software upgrades. Less sensitivity to mechanical stimulation when opening the facial recess and when exposed nerve is palpated in the facial recess have been noted by some surgeons.

A video entitled “***NIM Vital Sensitivity to Facial Nerve Mechanical Stimulation***” created by Nancy Young, MD is available on the AOS YouTube channel, ([click title to view video](#)). It illustrates the potential advantage of four channel EMG recordings that include the Mentalis muscle. Additional strategies to optimize sensitivity include 1. Use of non-insulated EMG electrodes; and 2. Lowering the default stimulation threshold and high pass filter settings. The former is located on the main monitor display and the latter is found in Settings. It is also recommended to boot up the NIM VITAL before removing the patient electrode interface to place on the operating table. It is important to provide feedback to the *Medtronic* team supporting your institution. Additional software upgrades are planned, and feedback is essential. Reporting of concerns that include screen shots can be particularly helpful.

ATTN new ANS members! “Young ANS” is now “Early Career ANS”!

To better represent the environment, opportunities, and challenges of neurotologists in their early career, the Young ANS organization is now known as the Early Career ANS. Please keep an eye out for announcements relating to our annual event at the Fall ANS meeting. Fellows and trainees are also welcome to attend. Please contact co-directors [Anne Maxwell](#), [Phil Perez](#), or [Nate Cass](#) with questions, comments, or concerns. A huge shout out to James Naples, Candace Hobson, and Shawn Stevens for their remarkable leadership in the early career group throughout their 3-year term!

APPLY BY JULY 15

**DO YOU HAVE WHAT IT TAKES TO BE THE EDITOR-IN-CHIEF
OF OUR FLAGSHIP JOURNAL, OTOLOGY & NEUROTOLOGY?**

WOULD YOU LIKE TO SHAPE THE FUTURE OF O&N GROUNDBREAKING RESEARCH!?

[*\(Click here to see full job description\)*](#)

Otology & Neurotology, Inc. is seeking a new Editor-in-Chief (EiC) for *Otology & Neurotology* (O&N) for a five-year term effective July 2026. The incoming EiC will be announced in Q4 2025. In early 2026, the incoming EiC will begin training for the role while working alongside the current EiC, Lawrence R. Lustig, MD during the transition period.

POSITION SUMMARY

O&N is the official journal of the American Otological Society (AOS) and the American Neurotology Society (ANS) and is affiliated with several other international organizations. O&N plays a pivotal role in driving the research agenda and research education in otology, neurotology, and cranial base surgery. The EiC sets the editorial direction and has final authority for the selection and quality of all content published in O&N, a journal committed to the rapid dissemination of important and enduring discoveries relating to the human ear and its diseases. As such, the EiC is expected to have a broad knowledge of the specialty and will have a clearly articulated vision for O&N. The broadly international character of O&N's contributing authors, editorial board, and readership provides the Journal its decidedly global perspective.

APPLICATIONS

Interested candidates may apply for the O&N EiC position by submitting an application package including their **curriculum vitae and a letter of interest summarizing their qualifications and describing their vision for O&N (2 pages maximum)**. Selected applicants will be invited to present their candidacy to the Editor Search Committee. Following the completion of interviews and any necessary follow-up with candidates, the Editor Search Committee will make their recommendation for the next O&N EiC to the O&N, Inc. Board of Directors. The Board of Directors anticipates selecting and appointing the new EiC in Q4 2025. Application materials must be submitted **by Tuesday, July 15, 2025**. Submit applications to ONeditorsearch@gmail.com.

O&N, Inc. is committed to equal opportunities for all. All applicants for the EiC position will be considered without attention to race, color, religion, sex, sexual orientation, gender identity, national origin, veteran or disability status. This is a contract position.

REMINDER! WE ALWAYS NEED RELIABLE REVIEWERS

If you are interested in becoming an O&N and/or ONO reviewer, please contact our ANS/AOS Administrator, [Kristen Bordignon](#). She will connect you with the right person.

ANS STUDY GROUP CALL FOR PAPERS!

60th ANNUAL ANS FALL MEETING

"FAB FRIDAY", OCTOBER 10, 2025

JW MARRIOTT, INDIANAPOLIS, INDIANA

DO YOU HAVE AN INTERESTING CASE FOR THE STUDY GROUPS!?

SUBMISSIONS ACCEPTED MAY 1 - JUNE 15, 2025

For questions related to any of the study groups, please contact the coordinator listed below.

VESTIBULAR STUDY GROUP

This is the forum for discussion of the latest topics and challenging cases of vertigo and balance disorders that present to the Neurotologist. We would like to focus the Study Group each year on certain common scenarios, which may encompass multiple disorders. We believe that this will allow an in-depth discussion while not binding it to just one disease.

For 2025, we would like to discuss "Vestibular Neuritis/Acute Vestibular Syndrome." We invite 5-minute presentations of challenging cases as well as clinical/translational studies. The study group format will be abstract presentations followed by panel discussion. **Please submit all abstracts to Dr. Gerard Gianoli (ggianoli@gmail.com) and Dr. Brian Perry (drbperry@outlook.com) by June 15, 2025.** Please include a title, submitting the author's full name, designation, and email. Please limit abstract to 125 words or less; abstract must be in Microsoft WORD format please, no pdfs.

Gerard Gianoli, MD, Coordinator and Brian Perry, MD, Coordinator

FACIAL NERVE STUDY GROUP

Abstracts will be accepted for 5-minute Facial Nerve study group case presentations followed by discussion between May 1 and June 15, 2025. The abbreviated abstracts should include a title AND clinical presentation only. The format is an "unknown" or "complicated" case presentation. **Please submit all abstracts to Dr. Mia Miller, (Mia.miller@cshs.org) and Dr. Dan Sun, (daniel.sun@uc.edu) by June 15th.** Don't forget to include a title, submitting author's full name, designation, and email. Please limit abstract to 125 words or less; abstract must be in Microsoft WORD format please, no pdf's.

Mia Miller, MD & Daniel Sun, MD, Coordinators

SKULL BASE TUMOR STUDY GROUP

The scope of this study group encompasses the full breadth of lateral skull base tumors, including vestibular schwannomas, meningiomas, paragangliomas, and other more rare neoplasms involving the temporal bone and lateral skull base. We are seeking submissions for the 2025 program, including clinical studies, case presentations, and other succinct scientific reports. An emphasis on submissions related to new concepts and innovations in treatment are encouraged. However, members are also welcome to submit difficult cases with management dilemmas for group discussion. Abstracts will be accepted between **May 1-June 15, 2025**. Please do not forget to include an abstract title, author full names with titles, author affiliations, and presenting author's email. Please limit abstract submissions to 250 words or less; abstracts must be submitted in Microsoft WORD format. **Abstract submissions and all inquiries should be directed to: carlson.matthew@mayo.edu and cjvoelker95@gmail.com by June 15th.**

Matthew Carlson, MD & Courtney Voelker, MD, PhD Coordinators

WILLIAM HOUSE STUDY GROUP

Please plan to attend the 41st gathering of the WHSG as a part of the "Super Saturday" events during the ANS 60th Annual Fall meeting in Indianapolis, IN on October 10th. The WHSG discussion will include all implantable auditory devices, including cochlear and bone anchored implants. Difficult/interesting/unusual cases that illustrate novel concepts or management dilemmas related to implantable devices are encouraged. Please limit abstract to 125 words or less; abstract must be in Microsoft WORD format please, no pdf's. Please include a title, submitting author's full name, designation, and email and submit to maura.cosetti@mountsinai.org and mbonilla@nyee.edu (Dr. Cosetti's admin) between May 1 and June 15th.

Maura Cosetti, MD & Marc Bennett, MD, Coordinators

MARK YOUR CALENDAR!

ONLINE REGISTRATION FOR "FAB FRIDAY" WILL OPEN JULY 7, 2025.

From the Chair

We are better together as a specialty and the ultimate endeavor of the ANS Diversity and Inclusion committee is to engage our diverse membership and improve the care we deliver to the diverse populations of patients that we care for.

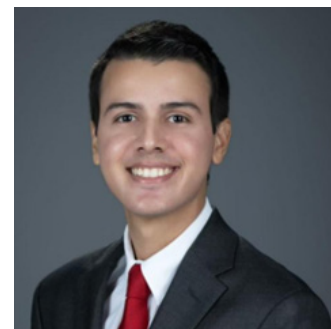

Longevity of these efforts requires the development of roles within this committee and in this vein, we have developed our first two roles, Dr. Angela Peng who will serve as the co-organizing lead for the COOL-OTO event, and Charlotte Hughes, MD who will serve as the research committee liaison and will be mentored by a fellow committee member, Dr. Matthew Bush, who is an established extramural surgeon-scientist and leader in our specialty. Fostering the development of leadership skills in those who serve on our committees is critical to the future of our specialty.

Our endeavors as a committee fall into 3 main areas: pipeline development, promotion of scholarship and research, and membership engagement. In terms of pipeline, we continue to support deserving URiM medical students interested in otolaryngology with limited opportunities to pursue otolaryngology acting internships. This year, our two scholarship recipients, Naomi Tesema and Alejandro Marrero-Gonzalez successfully matched into otolaryngology residencies (details below). Congratulations and thank you to their mentors from the ANS. Their match is as much a testament to their hard work as well as mentorship and preparation by our members.

Naomi Tesema graduates from the Pritzker School of Medicine in Chicago and was matched with Otolaryngology at Loyola School of Medicine. She was mentored by Tom Roland, Esther Vivas, Elizabeth Dinces, and Howard Moskowitz.

Alejandro Marrero-Gonzalez graduates from the University of Puerto Rico School of Medicine and was matched with Otolaryngology at the University of Pittsburgh. He was mentored by Habib Rizk and Ted Meyer

Otolaryngology

Scholarship and

Membership Engagement

(Continued) We also organized another highly successful Community Outreach Opportunities for Learning Otology and Otolaryngology (COOL-OTO) high school outreach event in Miami at the Booker T. Washington Senior High School and expanded the collaboration with other otolaryngology subspecialty societies with the ANS leading the way. This event spawned subsequent events between the school and the University of Miami Otolaryngology department and is a model for what pipeline development events like this seek to foster. A Youtube video of the event can be seen at this link (<https://www.youtube.com/watch?v=nostjJ1jHbo>). A special thank you to all of our volunteers including our star ANS members as well as the companies who supported this endeavor. Planning for this year's COOL-OTO High School Outreach event at the AAO-HNSF Annual Meeting in Indianapolis is well underway and will be held on Monday, October 13th at Crispus Attucks High School in close proximity to Indiana University School of Medicine. We welcome those interested in being part of the planning committee or participating in this event to reach out to Angela Peng (angela.peng@bcm.edu) or myself (michael.hoa@gunet.georgetown.edu).

The committee has also sought to encourage scholarship and research into health disparities in our subspecialty and we have funded our first grant, entitled "Assessing Barriers to Adult Cochlear Implantation in Underserved Populations" to the team at Vanderbilt consisting of Terrin N. Tamati, Ph.D. (co-PI), Jonathan Neukam, AuD (co-PI) and Aaron Moberly, MD (co-investigator).

Finally, one of the over-arching goals of the DI committee is to better understand the dynamic nature of our membership as it continues to evolve with blending of both new members and existing members. We are working to build representation across our membership on the committee. Building on the work of my predecessors on the composition of our meeting panels, committees, and leadership, we are working to centralize these data. We can only be better by having more accurate and centralized data about our specialty and its performance at our premier educational events. The work of this committee will include a focus on this so that we can ultimately better serve our whole membership.

Thank you for the opportunity to serve as DI Chair for the ANS.

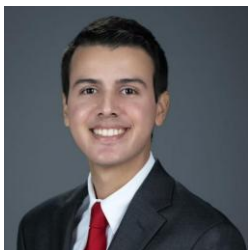

Michael Hoa, MD

Naomi Tesema graduates from the Pritzker School of Medicine in Chicago and was matched with Otolaryngology at Loyola School of Medicine. She was mentored by Tom Roland, Esther Vivas, Elizabeth Dinces, and Howard Moskowitz.

From Naomi Tesema: “I am incredibly grateful for the support of the American Neurotology Society during my clinical experiences in otolaryngology. Applying to away rotations and residency is a daunting process, but the generous contribution from the ANS not only helped offset the costs of travel—it also gave me the opportunity to further immerse myself in the field and appreciate the full breadth of the specialty. During my clinical rotations, I encountered new diagnoses and techniques for treating otolaryngologic conditions that I hadn’t been exposed to before. Across both urban and suburban settings, I observed how otolaryngologists care for patients from diverse socioeconomic and cultural backgrounds and discovered strategies of care that I plan to emulate in residency. The feedback and advocacy I received from my ANS mentors strengthened my skills and made me a more confident, capable student. I’m honored to be joining the field of otolaryngology and look forward to continuing to collaborate with my mentors and new colleagues in the years ahead.”

Per Dr. Roland: “[Naomi] did very nicely on the rotation. I have become one of her mentors for the application to residency process as well. Overall, she had 10 interviews and has a nice list of programs and has a well thought out rank list. I wrote notes to support her application to her top 4 programs. She was very appreciative for the ANS support.”

Alejandro Marrero-Gonzalez graduates from the University of Puerto Rico School of Medicine and was matched with Otolaryngology at the University of Pittsburgh. He was mentored by Habib Rizk and Ted Meyer.

From Alejandro Marrero-Gonzalez: *“The ANS Diversity and Inclusion Committee Scholarship alleviated the financial burden of completing an away rotation, allowing me to attend a rotation at MUSC, where I observed complex surgeries and received mentorship from attendings in that subspecialty. This experience increased my interest in pursuing a career in neurotology and my passion for academic research. Additionally, the financial support provided by the scholarship enabled me to allocate resources toward attending more in-person interviews, giving me the opportunity to showcase my commitment to the field and establish meaningful connections with faculty and residents.”*

Per Drs. Rizk and Meyer: *“We were very happy with Alejandro. He did great on his rotation and integrated well with the residents and got his assignments and tasks done. We are very happy to hear that he matched as well.”*

ANNOUNCEMENTS

- Call for those interested in serving on the ANS DI Committee and furthering its mission. Please send in a statement of interest and a CV if interested to Michael Hoa (michael.hoa@gunet.georgetown.edu)
- Tell your medical student mentees to look out for application due date for the URiM Otology Neurotology Travel Grant in June 2025
- Save the Date – COOL-OTO at AAO-HNSF in Indianapolis, October 13, 2025
