

American Neurotology Society : Research Grant

Purpose To encourage and support academic research in sciences related to the investigation of Otology and Neurotology

To prepare clinician-scientists for submitting an Early Career Research Award R21 application to the NIDCD (previously known as an R03)

Target Applicants Physician investigators in the United States and Canada; Individuals without a history of K08, R03, R21, or R01 funding

Focus Areas:

Diagnosis, management, and pathogenesis of diseases of the ear and/or skull base

Cell/molecular studies, animal research, or human subjects research

Studies that address clinical gaps are especially encouraged

- **All Applications:** Simple 3-page research strategy
- **Budget:** \$25,000 for one year
 - Direct costs only; Indirect costs are not allowed
 - 2nd year funding available but will compete with new applications
- **Dates:**
 - Grant submission deadline: Monday March 3, 2025
 - Funding dates: July 1 - June 30
 - Brief written feedback will be provided

American Neurotology Society : Research Grant Focus Area

American Neurotology Society / Vestibular Disorders Association (VeDA)

Purpose To encourage and support academic research in topics aimed at improving **clinical outcomes of patients with vestibular disorders**

Target Applicants Physician investigators in the United States and Canada; Individuals without a history of K08, R03, R21, or R01 funding

Starting in 2025 – Funding of one of the 3 ANS Research Grants will be dedicated to research focused on vestibular disorders

Proposed research areas:

- New treatment methods
- Development of new instruments to gauge outcomes
- Multidisciplinary care delivery models
- Translational research projects
- Basic research

The logo for the Vestibular Disorders Association (VeDA) features the letters "VEDA" in a large, black, sans-serif font. A horizontal teal line is positioned behind the letters "E" and "D".

American Neurotology Society: Advancing Diversity, Equity Inclusion and Accessibility (DEIA) in Otology and Neurotology Grant

Purpose To encourage and support academic research in topics aimed at incorporating and fostering diversity, equity, inclusion and accessibility within Otology and Neurotology

Target Applicants Physician investigators in the United States and Canada; Individuals without a history of K08, R03, R21, or R01 funding

Focus Areas –

- Innovative approaches to addressing DEIA-related aspects of patient care
- Development of innovative research methods to investigate DEIA in our specialty
- Assessment of disparities in otologic and neurotologic clinical care and research
- Innovative methods to promote equity in clinical care and research

Eligibility – open to ANS members (residents and faculty) or sponsored non-members

- Innovative, team-based proposals are encouraged

Simple 3-page research strategy

Budget – One year, up to \$10,000

American Neurotology Society Research Grant

American
Neurotology
Society

The American Neurotology Society Research Fund only accepts grant applications and reference letters electronically. Please prepare your application electronically and have everything contained in ONE PDF (no pdf portfolio). Please submit your final PDF application by email. Reference letters may be electronically prepared and signed as PDF documents, or may be scanned as PDF documents, in order that they may be included as part of the grant application.

Submit grants and reference letters via email to:

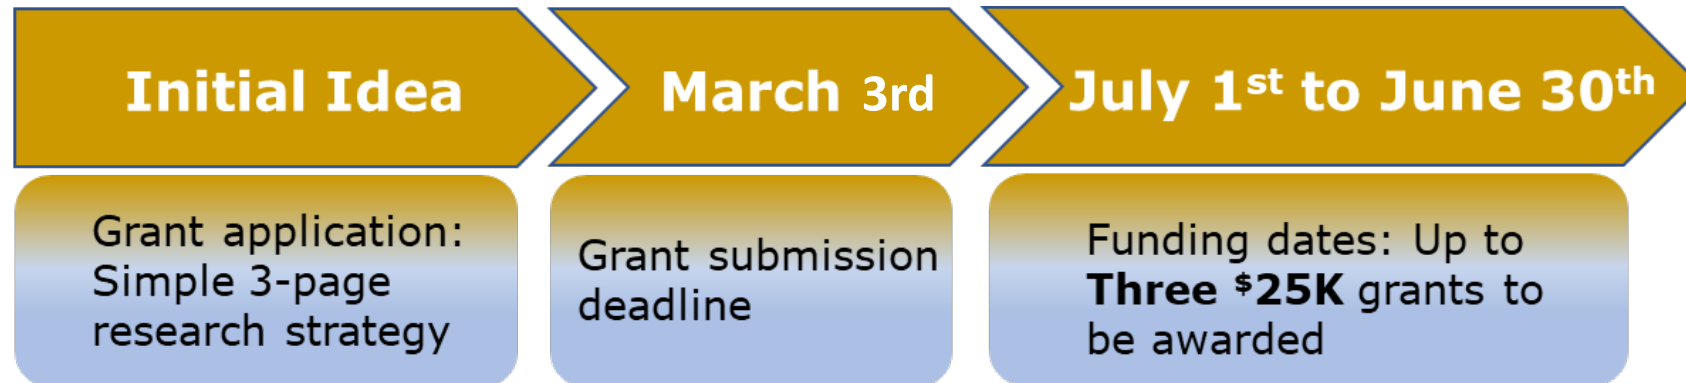

Dr. Aaron Remenschneider
Chair of the ANS Research Committee

&

Kristen Bordignon
Administrator of the American Neurotology Society
