ear medical group
otology/neurotology

M. Geraldine Zuniga, M.D.

November 13, 2023

Dear Neurotology Fellow:

I would like to extend an invitation to consider joining me and my team at Ear Medical Group, a private practice Neurotology group in San Antonio, Texas. The Ear Medical Group was founded in 1995 by me and Dr. James E. Olsson, who has since retired.

Currently, Ear Medical Group is comprised of two fellowship trained Neurotologists, Dr. M. Geraldine Zuniga Manrique and me. We are supported by three Neurotology Physicians Assistants, two highly experienced Doctors of Audiology, three Oto/Vestibular techs, and an allergy nurse. We have a very busy clinical practice centered around all aspects of Neurotology and related pathology. This comprises a complete Audio/Vestibular lab, allergy testing and treatment, and a successful hearing aid practice, which is run separately by a Ph.D. level Audiologist.

Early partnership track employment is available. Ear Medical Group offers a competitive salary and benefits package. Our practice is in the same building as an ambulatory surgical center that supports all our outpatient surgeries. Investment opportunities in the surgery center are available. We partner with a private practice skull base Neurosurgeon and Fellowship trained Head and Neck surgeon. Inpatient surgical support is available through the Methodist Healthcare System. We also partner with doctoral level physical therapists.

I am a Clinical Professor of Otolaryngology, Head and Neck Surgery at UT Health San Antonio. If you are interested in participating in resident education, this can also be arranged. We have been involved in clinical trials for drug candidates for hearing loss and tinnitus in the past and are set up for future clinical research trials.

Nestled deep in the heart of Texas, San Antonio is a great place to live. San Antonio living provides a high quality of life with rich culture and family-friendly amenities, a relatively low cost of living, affordable housing, sunny weather year-round, excellent schools, and no state income tax.

Ear Medical Group is a great place to work. The practice is financially sound having maintained its independence for the life of its existence. Ear Medical Group provides an excellent opportunity to join a busy clinical practice with a built-in infrastructure to cultivate a successful and rewarding career in Neurotology.

If you are interested in learning more about this practice opportunity, please send your curriculum vitae to Sandra R. Swisher, CEO/Administrator at sandras@earmedicalgroup.com.

Sincerely,

Susan Marena King, M.D., F.A.C.S.
